

## Double Degrees

The "Double Degree" is a joint study program established by two or more universities that allows students to attend part of their studies at their home university and part at partner universities, ultimately obtaining a degree recognized in the involved countries. This course of study promotes educational diversification, the deepening of a foreign language, and the understanding of a different nation and culture. It introduces students to an international context that increasingly facilitates their entry into the job market. Therefore, the "Double Degree" is intended for students enrolled in degree programs that have specific agreements with a foreign university. The Polytechnic University of Bari has developed Double Degree programs with prestigious universities in Europe and around the world, with durations varying according to the agreements.
